

# Exhibit 72

---

IN THE UNITED STATES DISTRICT COURT  
FOR THE MIDDLE DISTRICT OF NORTH CAROLINA  
CIVIL ACTION NO. 1:14-CV-00954-LCB-JLW

STUDENTS FOR FAIR  
ADMISSIONS, INC.,

Plaintiffs,

vs.

UNIVERSITY OF NORTH  
CAROLINA, et al.,

Defendants.

---

DEPOSITION  
OF  
JENNIFER KRETCHMAR

---

TAKEN AT THE OFFICES OF:  
UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL  
222 East Cameron Avenue  
110 Bynum Hall  
Chapel Hill, NC 27514

03-07-17  
8:51 A.M.

---

1 increasing volume in applications, we made a  
2 decision at that time not to review every single  
3 one twice.

4 Q. And you said you're -- did you also say  
5 you're involved in school group review?

6 A. I have been. Uh-huh (yes).

7 Q. Are you right now or ---

8 A. I am.

9 Q. Okay. So can you just describe the  
10 school group review process?

11 A. Sure. So essentially you're either  
12 assigned to in-state or out-of-state school group.  
13 The first deadline, I was in-state school group  
14 review. This deadline, I'm out-of-state school  
15 group review. I'm assigned certain states. I'm  
16 going to get a list of all decisions by school for  
17 those states. They're typically ranked by either  
18 GPA or rank.

19 I use a physical printout of those  
20 sheets -- most people in the office do. We're  
21 essentially doing two things. At the point that  
22 we do school group review, we know whether we have  
23 to pull down or pull back in order to meet our  
24 enrollment goals. We have a -- an instruction to,  
25 you know, look for certain decisions to change.

1 And it's also a quality check, so we're looking  
2 for fairness of decisions within the school.

3 So essentially you go through each  
4 school. You look at applications that you might  
5 want to go into and do another full read and --  
6 it's essentially the holistic review all over  
7 again. You may change a decision, you may not.

8 Q. When you say it's the holistic review  
9 all over again, does that mean that during school  
10 group review the reviewer typically reviews the  
11 entire application file?

12 MR. SCUDDER: Objection.

13 A. They -- they can, yeah. So for ones  
14 that you're going into, they're going to open up,  
15 they're going to see the evaluation page. They  
16 might go through every document in the  
17 application. Yes.

18 They also have the information that's on  
19 the evaluation page, which is a summary of the  
20 holistic review. So...

21 Q. (Mr. Strawbridge) Is the school group  
22 review conducted by the more senior officers in  
23 the Admissions Office?

24 A. Yes.

25 Q. Okay. And who are they this year, for

1 candidate. We've decided not to admit them. If  
2 we have space available, they're someone we'll re-  
3 review and consider for admission.

4 Q. Do you know what I mean when I refer to  
5 yield?

6 A. Yes.

7 Q. And what is yield?

8 A. Yield is the percent of students who are  
9 admitted who end up enrolling.

10 Q. Are students on the wait list  
11 essentially, you know, waiting to see how the  
12 yield of the admitted students works out?

13 A. Yeah. I mean, that's standard practice  
14 in admissions. Schools typically have a wait list  
15 because this is an art in science and in case we  
16 don't come in right at our number -- we come in  
17 under, then you can admit from the wait list.

18 Q. You're responsible for building the  
19 yield model for the University?

20 A. Yes.

21 Q. And have you maintained a yield model  
22 for the entirety of your time at UNC?

23 A. Not the entirety of my time. It's  
24 probably been the last eight or so years.

25 Q. And what information do you use to model

1       yield?

2           A.     Deadline, residency, underrepresented  
3     minority status, and test score bands.

4           Q.     And let's start with residency.

5           A.     Uh-huh (yes).

6           Q.     You use different yield models for in-  
7     state versus out-of-state residents?

8           A.     I wouldn't say it's a different yield  
9     model. Those four variables comprise 40 different  
10    cells that each student might fall into and  
11    there's a yield for that cell, if that makes  
12    sense. So...

13          Q.     I guess my question, and I apologize for  
14    not being clear, when you say residency, is it  
15    anything beyond just in-state or out-of-state? Do  
16    you model yield based on counties in North  
17    Carolina, for example?

18          A.     No, we do not.

19          Q.     With respect to underrepresented  
20    minority status, what do you mean when you say  
21    underrepresented minority?

22          A.     Specifically, with reference to the  
23    yield model, it's African-American, American  
24    Indian or Hispanic.

25          Q.     And outside the yield model, is that --

1 the data base?

2 A. Yes.

3 Q. Would it be a new field or would an  
4 entry be changed? In other words, at the end of a  
5 given year, could you identify the people who are  
6 both deferred and then wait listed?

7 MR. SCUDDER: Objection.

8 A. You can identify the people who are both  
9 wait listed and deferred.

10 Q. (Mr. Strawbridge) I supposed if they're  
11 classified as D-1 and then they're on the wait  
12 list, that's going to be that population?

13 A. Right.

14 Q. You mentioned the ratings that are given  
15 to applicants ---

16 A. Uh-huh (yes).

17 Q. --- by the readers. What -- which  
18 categories are rated?

19 A. The first one is called program. It's  
20 the strength of the curriculum. The second one is  
21 performance. We rate their -- their grades,  
22 essentially. We rate their extracurricular  
23 activities, we rate their essay, and then we have  
24 a final category called personal qualities that we  
25 rate.

1 Q. Let's start with program. What is the  
2 rating scale for program?

3 A. It's one to ten.

4 Q. And it's -- it's ten increments?

5 A. Right.

6 Q. And ten being the highest?

7 A. Correct.

8 Q. And is there a guide as to how you  
9 should rate a program on that scale?

10 MR. SCUDDER: Objection.

11 A. We do have a definition of the program  
12 rating. It's a count of the number of college  
13 level courses.

14 Q. (Mr. Strawbridge) When you say it's a  
15 count of college level courses, is that a count  
16 that is offered at the school or that the  
17 applicant took?

18 A. That the applicant took.

19 Q. Okay. So if they took five college  
20 level courses, what would their rating be?

21 A. Five.

22 Q. If they took ten?

23 A. Ten.

24 Q. And has that scale been the same during  
25 your time at UNC?

1           A.    It's changed over -- I mean, I've been  
2           here 15 years, so it's changed slightly. In the  
3           beginning we didn't count. I can't tell you when  
4           it shifted to a count.

5           Q.    During your time at UNC, has there --  
6           has there been a decision made to put less  
7           emphasis on the program rating in the admissions  
8           process?

9                       MR. SCUDDER:  Objection.

10          A.    I would say different emphasis.

11          Q.    (Mr. Strawbridge)  How would you  
12          describe the change to a different emphasis?

13          A.    We did our own research looking at the  
14          relationship between the number of college level  
15          courses a student takes and their performance  
16          here, and we found a sort of leveling off after  
17          the five or six point, all other things being  
18          equal. We used to assume that the more courses  
19          someone took, the better prepared they were, you  
20          know. Twenty is better than 15, 25 is better than  
21          20. And so this has -- we've shifted our  
22          evaluation according to the results of these  
23          studies, so...

24          Q.    So has it led to a change in the  
25          scoring system?

1           A.    No.

2           Q.    But it's -- the instruction is to give  
3   less emphasis to the program rating at a certain  
4   point?

5           A.    The instruction is to recognize that  
6   someone who has taken 15 isn't necessarily better  
7   prepared than someone who has taken eight, for  
8   example. The results also showed that somebody  
9   who takes five or six is going to perform better  
10   than someone who doesn't take any. So it's a more  
11   nuanced understanding of program.

12          Q.    Is that all that goes into program is  
13   college level courses?

14          A.    Yes.

15          Q.    And so students who are at schools that  
16   don't provide as many college level course  
17   options, do they have less opportunity to earn a  
18   higher program score ---

19          A.    Uh-huh (yes).

20          Q.    --- through no fault of their own,  
21   correct?

22                   MR. SCUDDER:  Objection.

23          A.    Some students might have less  
24   opportunity to earn a higher score based on what  
25   their school offers. Is that the question?

1 Q. (Mr. Strawbridge) Correct.

2 A. Essentially, yes. There are ways to go  
3 beyond the school curriculum, but...

4 Q. Is the number of courses made available  
5 to a particular student taken into account in the  
6 admissions process?

7 A. Yes.

8 Q. How?

9 A. A school profile is available -- is  
10 provided by the counselor, so it's part of the  
11 application that we review as we're reviewing the  
12 applicant.

13 Q. And so it's up to the individual reader  
14 to sort of note that this applicant may have only  
15 taken four courses, but their school only offers  
16 six, for example?

17 A. Right.

18 Q. And that would show up in the reader  
19 comments?

20 A. It could.

21 Q. Is there anywhere else it would be  
22 accounted for in the applicant data?

23 A. Other than the school profile, which is  
24 attached to the application, no.

25 Q. What is the rating scale for

1 performance?

2 A. It's also one to ten.

3 Q. Ten being highest?

4 A. Yes.

5 Q. Is that true for all the scores? It's  
6 the higher ---

7 A. Yes. Uh-huh (yes).

8 Q. And what dictates what -- what earns a  
9 ten, for example?

10 A. So, a ten is straight A's. We have a  
11 guide, so a nine would be one to two B'S and so  
12 on, so forth. So it's -- it's a little more  
13 subjective. It's not -- it gets messier the  
14 further down you go. It takes into account grade  
15 trend.

16 Q. You said he takes into account grade  
17 trend. What does that mean?

18 A. If poorer grades are showing up later,  
19 the rating might reflect that as opposed to a few  
20 B's in ninth grade, for example.

21 Q. And it's just the reader's -- the reader  
22 is instructed to make an adjustment for -- for  
23 grade trend?

24 A. Uh-huh (yes). It's -- it's part of the  
25 guide. I mean again, there's -- it can't be

1 entirely prescriptive, but we train on this  
2 and ---

3 Q. And besides earned grades, does anything  
4 else go into the performance grade?

5 A. The trends, like I said. So the grades  
6 themselves and the trends are the two primary --  
7 the two things.

8 Q. But, for example, standardized test  
9 scores are not part of the performance ---

10 A. No.

11 Q. --- analysis? Extracurriculars?

12 A. Uh-huh (yes).

13 Q. Is it the same grading scale?

14 A. I think that this one's one, three,  
15 five, seven, ten, I think. I -- we've gone --  
16 we've gone back and forth over the years. I think  
17 it's one, three -- we've gone back and forth to  
18 the full scale for extracurriculars versus a  
19 compressed fewer items on the scale.

20 Q. And why is that?

21 A. I don't know. I mean, I think you'd  
22 have to ask people in charge of the reading  
23 process.

24 Q. And who would that be?

25 A. Jared, Barbara.

1           Q.    And are there guidelines as to what  
2           earns a one, three, five, seven or ten?

3           A.    Yeah.  I mean, we look -- so, we look  
4           for things like leadership in extracurricular  
5           activities.  We look for continuity across years,  
6           amount of commitment in terms of hours, we look  
7           for achievement at different levels, achievement  
8           within the context of the school, and, you know,  
9           state level achievement, national achievement.  So  
10          those are the -- sort of the anchors for that.

11          Q.    Would you agree that because of the  
12          variety of extracurricular activities it's a bit  
13          more subjective than the prior two scores?

14          A.    I would agree.

15          Q.    What's the essay grading scale?

16          A.    One, three, five, seven, ten.

17          Q.    And again, do you know why there's only  
18          five increments on that scale?

19          A.    No.

20          Q.    And there's a rubric or a guide to -- on  
21          how to grade essays?

22          A.    There is.

23          Q.    And what is the basic guidance that's  
24          given as to what to look for in the essays?

25          A.    So we -- the rubric is -- is based on

1       six things that we've essentially compressed to  
2       three, so the idea, the originality,  
3       sophistication of the idea, student voice in the  
4       writing and grammar syntax, et cetera.

5           Q.     How many essays does each applicant  
6       submit?

7           A.     This most recent year, they submit the  
8       one for the common app that all common app  
9       students submit and then we had a supplement that  
10      had two shorter essays.

11          Q.     And they -- they are to do both of  
12      those?

13          A.     Yes.

14          Q.     Okay. And what were the topics of the  
15      essays?

16          A.     Oh, my gosh.

17          Q.     If you don't know, that's fine.

18          A.     There were -- I mean, there are choices.  
19      Oh, my God.

20          Q.     So it wasn't two specific topics? It  
21      was write two of the following choices?

22          A.     So again this is something that's  
23      changed every year.

24                   MR. SCUDDER: He's just asking if  
25      you know it.

1           A.     I don't know.

2                         MR. SCUDDER:   He can -- we can look  
3     it up.

4                         THE WITNESS:   I don't know for  
5     sure.   I don't know.

6                         MR. SCUDDER:   Okay.

7                         THE WITNESS:   Yeah.

8           Q.     (Mr. Strawbridge)   That's fine.

9           A.     Okay.

10          Q.     And how is personal quality scaled?

11          A.     One, three, five, seven, and ten.

12          Q.     And what are the guidelines for personal  
13     quality?

14          A.     So there's six or seven things.   I'm not  
15     sure I could list all of them right now.  
16     Exceptional achievement, overcoming adversity,  
17     contribution to diversity, diversity broadly  
18     defined.

19          Q.     When you say "diversity broadly  
20     defined," what do you mean?

21          A.     In all the ways that diversity could be  
22     defined so the student is bringing something  
23     unique, whether it's an international background,  
24     having lived abroad, being multilingual, having  
25     grown up in extreme poverty, a unique talent.

1           Q.    Would that definition include URM  
2   status?

3           A.    It could.

4           Q.    In addition to the categories we've just  
5   discussed, there's also -- you said that the --  
6   the reviewers also enter GPA?

7           A.    Correct.

8           Q.    And is there a standard method for  
9   calculating GPA?

10          A.    This has also changed just this year.  
11   So, let me just tell you what we did last year.  
12   It was either an official 4.0 weighted scale. We  
13   didn't do any calculation. We just lifted from  
14   the transcript. If the GPA was reported on a 4.0  
15   official scale, we entered it and then -- so  
16   there's a GPA field then a GPA type. GPA type  
17   would be 4-point. Anything on not on a 4.0  
18   weighted scale would be other. And I don't think  
19   we required -- since we weren't reporting those,  
20   it didn't necessarily have to entered.

21                This year because of changes in  
22   reporting from the general administration, what we  
23   have to report to the GA, there are multiple GPA  
24   types. So 8-point scale, 12-point scale, 100-  
25   point scale, we're recording all of those now.

1           Q.    But whenever you ran a particular  
2   report, there would be a script run to do that  
3   basically?

4           A.    I would concord them and compare them  
5   for my purposes.  Now the flat file contains that  
6   highest concorded score.

7           Q.    Besides any comments or notes, does the  
8   summary evaluation -- whether information is  
9   included on the summary evaluation sheet,  
10   performance, gradings, the SAT and the GPA,  
11   obviously the reader notes are recorded  
12   somewhere.

13          A.    Uh-huh (yes).

14          Q.    Is there anything else that goes into  
15   the summary evaluation?

16          A.    The decisions.

17          Q.    Admit, defer, wait list, denied?

18          A.    Right.

19          Q.    Anything else?

20          A.    Not that I can think of.

21          Q.    We touched on this earlier, but I just  
22   want to make sure I understand.  How are special  
23   talent admission cases handled with respect to the  
24   reading process?

25          A.    All candidates go through, all athletes,

1           A.    Yes.

2           Q.    So when you read a file, how does race  
3 affect your grading of an applicant for admission?

4           A.    My rating?

5           Q.    Your recommendation as to whether an  
6 applicant should be admitted?

7           A.    I mean, I read each applicant as an  
8 individual. I'm looking through all of the pieces  
9 of information in the file, which, who knows how  
10 many that adds up. I mean, all the information  
11 from the letter of rec to their extracurriculars,  
12 to their essays, to their parent education  
13 background and occupation, to how many languages  
14 they speak. The race and ethnicity is visible on  
15 the app evaluation summary sheet. I see it. It's  
16 one factor that I take into account in getting to  
17 know that person as an individual.

18          Q.    If a student is URM, is that fact likely  
19 to be noted in comments that you make on a  
20 particular file?

21          A.    No.

22          Q.    In your experience, do first readers  
23 tend to notify -- tend to note URM status in their  
24 comments in a particular file?

25          A.    Yeah. I don't know that I have the

1 perspective on all first readers. I would say no.  
2 My -- my understanding would be no.

3 Q. So you don't think that URM is typically  
4 noted on the comments on the file of URM students?

5 A. I don't think so.

6 Q. Is race used to determine the overall  
7 shape of the class apart from the individual  
8 rating of an applicant?

9 MR. SCUDDER: Objection.

10 A. Again, I'm not sure I know what you mean  
11 by that question.

12 Q. (Mr. Strawbridge) Does the University  
13 track the racial makeup of the incoming class as  
14 the process moves along?

15 A. We do not.

16 Q. You do not?

17 A. No.

18 (EXHIBIT NUMBER 5 WAS MARKED)

19 Q. (Mr. Strawbridge) I'm handing you what  
20 the reporter has marked as Exhibit 5. Just take a  
21 second to familiarize yourself with this document.

22 A. Uh-huh (yes).

23 (Witness reviewed document)

24 Q. (Mr. Strawbridge) Do you recognize this  
25 document?

1           A.    I do.

2           Q.    What is this?

3           A.    We refer to it as a core report.

4           Q.    And what is the core report?

5           A.    So, this is a core report from 2013.  I  
6 just want to note that.  This isn't how our  
7 reports look today.

8           Q.    Okay.  We'll talk a little bit about the  
9 differences in a minute.  But what -- this is  
10 actually titled -- the subject is "Core Report  
11 Comparison."

12          A.    Uh-huh (yes).

13          Q.    Is there a difference between a core  
14 report and core report comparison?

15          A.    We've used a lot of different  
16 nomenclature.  I can't remember.  I think even the  
17 core report had a comparison component.  I can't  
18 be sure without going back and looking.

19          Q.    And what are -- what is the purpose of  
20 the core report generally?

21                   MR. SCUDDER:  Objection.  At this  
22 point in time, Patrick?

23                   MR. STRAWBRIDGE:  Yes.

24          A.    I mean, essentially it's to track  
25 progress relative to the same date and time

1 previous years.

2 Q. (Mr. Strawbridge) And when you say  
3 progress, what do you mean?

4 A. Number of applications received, for  
5 example, how far along we are in the reading  
6 process.

7 Q. Including admission decisions made?

8 A. Right.

9 Q. Do you know how -- was there a point in  
10 time when a core rep -- the core report comparison  
11 was created as a new report above and beyond the  
12 ordinary core report?

13 A. So you're referring to this as a core  
14 report comparison. That doesn't mean that --  
15 that's not any -- I've never used that  
16 terminology, so I'm not sure I can answer that  
17 question.

18 Q. I mean, just so we're clear. It's the  
19 subject line of this email.

20 A. No, I see that, but that doesn't mean  
21 that's how we specifically referred to this report  
22 consistently.

23 Q. Do you refer to this report as a core  
24 report?

25 A. Yeah.

1 definition of critical mass that informs the  
2 admissions office is used for race in the  
3 admissions process?

4 A. I couldn't --

5 MR. SCUDDER: Objection.

6 A. I couldn't say.

7 Q. (Mr. Strawbridge) You couldn't say?

8 A. No.

9 Q. What are people in the Admissions Office  
10 told about using race to achieve critical mass?

11 MR. SCUDDER: Objection.

12 A. What is your question?

13 Q. (Mr. Strawbridge) What are people in  
14 the Admissions Office told about using race to  
15 achieve critical mass?

16 MR. SCUDDER: Objection.

17 A. We haven't had that discussion.

18 Q. (Mr. Strawbridge) You've never  
19 discussed what critical mass would be in the  
20 Admissions Office?

21 A. I have not been a part of that  
22 discussion. I -- I know critical mass is  
23 referenced in the reading document. I don't write  
24 the reading document. I haven't been part of  
25 those conversations.

1           Q.    In 12 -- more than 12 years -- in 14  
2 years ---

3           A.    Uh-huh (yes).

4           Q.    --- going in the Admissions Office ---

5           A.    Uh-huh (yes).

6           Q.    --- you don't recall being a part of  
7 conversation as to what would constitute critical  
8 mass?

9           A.    No.

10          Q.    In all your work on the race-neutral  
11 alternatives committee, you don't recall having a  
12 discussion about what would constitute critical  
13 mass?

14          A.    Do you mean how other people define  
15 critical mass or what ---

16          Q.    To how the University defines critical  
17 mass.

18                   MR. SCUDDER:  Objection.

19          A.    I don't.  I don't recall that  
20 conversation.

21          Q.    (Mr. Strawbridge)  How many meetings did  
22 you have with the Race-Neutral Alternatives  
23 Working Group?

24          A.    Off the top of my head, I don't  
25 remember.  I don't know.

1 Q. Half a dozen?

2 A. Six to eight, I guess I'd say.

3 Q. Okay. And how many meetings of this  
4 committee so far?

5 MR. SCUDDER: The new committee.

6 Q. (Mr. Strawbridge) The new committee.

7 A. Probably about the same number.

8 Q. And no recollections of discussion as to  
9 how the University defines critical mass?

10 MR. SCUDDER: Objection.

11 A. I don't have any recollection of that  
12 discussion.

13 Q. (Mr. Strawbridge) You personally said  
14 it was some number. Do you have an idea as to  
15 what that number would be?

16 A. No.

17 Q. Do you think it's a specific number or  
18 do you think it's a range?

19 A. I don't think it's a specific number.

20 Q. Do you think it's a range?

21 A. I think you have to pay attention to  
22 numbers somewhat in order to achieve critical  
23 mass. I don't -- I don't know if I would -- I --  
24 I don't know.

25 Q. But the concept as you've described it

1           A.     So one on the reliability of the  
2 readings was published in the NACAC Journal. I  
3 presented at NACAC once on looking for bias in  
4 letters of recommendation.

5           Q.     Okay. Anything else?

6           A.     We contracted with an outside research  
7 firm to study the college choice process many  
8 years ago.

9           Q.     What was the name of that outside  
10 research firm?

11          A.     Olson Zaltman Associates.

12          Q.     And what aspect of the admissions  
13 process were they studying?

14          A.     They have a patented methodology, so we  
15 were just looking at factors that are important in  
16 -- in how students choose colleges to apply and  
17 attend to. It ended up being -- it was a sample  
18 of men, North Carolina prospective students, male  
19 prospective students.

20          Q.     In your time as -- in the research  
21 department of the UNC Admissions Office, have you  
22 ever conducted any studies to see the effect of  
23 controlling for all other factors that race was  
24 having on the likelihood of admissions?

25          A.     No.

1           Q.    Has anyone ever asked you to look into  
2   that question?

3           A.    No.

4           Q.    Have you ever heard any discussion about  
5   the possibility of doing that kind of analysis?

6           A.    No.

7           Q.    Directing your attention back to the  
8   exhibit in front of you.  If you can turn to page  
9   7 of this report.

10   (Witness complied)

11          Q.    There's a block quote there that I think  
12   is attributed to the faculty advisory committee's  
13   statement on undergraduate admissions.

14          A.    Uh-huh (yes).  Yes.

15          Q.    Are you familiar with that document that  
16   it's excerpting the quote from here?

17          A.    Not -- not off the top of my head, I'm  
18   not familiar with it.  I've probably seen it  
19   before.

20          Q.    The quote that it attributes to that  
21   document here says "In evaluating candidates for  
22   admission, we do not seek to maximize the average  
23   SAT score or the average eventual GPA of the  
24   entering class."

25          A.    Uh-huh (yes).
